OUSIA bioCAL

Medical Grade Surgical Plaster, Highly Purified Calcium Sulfate.

bioCAL is one of the first bone materials ever used and maintains a safety record dating back more than 100 years. bioCAL is considered one of the clinician's first choices among synthetic bone grafting materials. bioCAL is sterile, highly purified and continues its bioactivity through the entire healing process. bioCAL is totally resorbed at the completion of the healing period.

bioCAL Features

- Osteoconductive
- Inhibits non-osteogenic cells
- Promotes wound healing
- Completely resorbable
- Easy to set-up
- Easy to handle
- Easy to place
- Combines well with OUSIA bone grafting particulate

bioCAL is recommended for:

- Periodontal defects
- Extraction sites
- Socket preservation
- Sinus augmentation

bioCAL Kit Contents

- 0.5 gram or 1.0 gram calcium sulfate powder in a sterile mixing dish
- Regular set liquid
